

A photograph of a modern hospital room. In the foreground, a white hospital bed is neatly made with white linens. To the left, a wooden bedside table holds a white telephone. On the wall above the bed, a white medical light fixture is mounted. In the background, a large window with light-colored curtains offers a view of green trees and a blue sky. A small grey sofa with yellow and grey cushions is positioned in front of the window. The room is bright and clean, with light-colored walls and a white floor.

KREA DESIGN

The medical lighting

Our aim is to satisfy Customer needs with products dedicated to the needs of health care facilities for the elderly and hospitals, providing lighting technology which has been designed and certified to best respond to the demands of patients and operators.

Each device – conceived, designed and manufactured entirely in Italy – is individually tested and conforms to current applicable regulations.

The set-up of every bedhead has been developed according to the specific requests of Project Management and can be customised in every detail: electrical sockets, control units, LED light sources, call systems and lighting management, colours and finishes may vary.

The Krea Design catalogue includes lighting fixtures, bedhead units with sockets and accessories and bedhead units complete with beams for medicinal gases.

Contact us and we will help you to choose the best product for your needs!

Krea Design srl has adopted a quality management system conforming to the UNI CEI EN ISO 13485 standard for Medical devices.
